PEOPLE SERVED 8,524	SERVICE CONNECTIONS 3,724	LINES REPORTED TO EPA 2,359	LEAD STATUS UNKNOWN 83.7%
------------------------	------------------------------	--------------------------------	------------------------------

EPA's records still show an open violation at Harrisburg for its lead service line inventory, and the baseline inventory the state needs next is due November 1, 2027.

EPA lists an open violation (code 2E, lead service line inventory) since October 17, 2024.

1. Service lines on EPA's record

CATEGORY	LINES	SHARE
Lead	0	0.0%
Galvanized requiring replacement	0	0.0%
Lead status unknown	1,975	83.7%
Non-lead	384	16.3%
Total reported	2,359	100%

2. What is due by November 1, 2027

By November 1, 2027, the state needs a baseline inventory of all 2,359 service lines and their connectors, plus a replacement plan, because 1,975 of them are lead, galvanized requiring replacement or unknown.

- The baseline inventory adds a connector entry for every line (lead, non-lead, unknown or none present), which the 2024 initial inventory did not ask for.
- Customers on a lead, galvanized requiring replacement or unknown line keep getting a yearly notice, as they have since 2024.
- The first inventory deadline was enforced: in 2024, 3,902 public water systems had a violation for missing it.

Rule text: 40 CFR 141.84(a)(2) and (c); notices, 40 CFR 141.85(e). Violation count: EPA National Public Water Systems Compliance Report, 2024.

3. Paying for it

Illinois EPA Lead Service Line Inventory (LSLI) grant, Round 4. Inventory only, not plans. Local governments with median household income under 120% of the state average; first come, first served. Illinois EPA's plan says the pot is almost spent, so call IFAS (217-782-2027) first.

Source: <https://epa.illinois.gov/topics/drinking-water/public-water-users/lsl-grant-opportunity.html>. EPA says State Revolving Fund lead service line money can pay for an inventory whether or not lead turns up (SRF Questions and Answers 9.13, October 2025). Each state sets who qualifies; ask your state's fund office.

4. Next step

With 3,724 service connections, Harrisburg falls in the 3,301 to 10,000 service connections size: the inventory and replacement plan kit is a fixed US\$6,900, invoiced after delivery, net 30. The full gap check, also free, adds your state's published inventory and sorts the unknown lines by the cheapest way to settle each one. Reply to the email this came with to ask for it.
